

Human-centered Computing: Challenges and Perspectives

Nicu Sebe

**Professor of Computer Science
University of Trento**

Thursday April 18 2013, 16:15-17:30, Viktor Franz Hess building, HS D

Human Centered Computing (HCC) is an emerging field that aims at bridging the existing gaps between the various disciplines involved with the design and implementation of computing systems that support people's activities. HCC aims at tightly integrating human sciences (e.g. social and cognitive) and computer science (e.g. human-computer interaction (HCI), signal processing, machine learning, and computer vision) for the design of computing systems with a human focus from beginning to end. This presentation will address the existing challenges in HCC and will focus on real-time and robust solutions for eye detection and tracking, head pose estimation and their applications to gaze estimation, attention detection and personality.

Nicu Sebe is with the University of Trento, Italy, where he is the dean of the doctoral school in ICT and is leading the research in the areas of multimedia information retrieval and human-computer interaction in computer vision applications. He was involved in the organization of the major conferences and workshops addressing the computer vision and human-centered aspects of multimedia information retrieval, among which as a General Co-Chair of the IEEE Automatic Face and Gesture Recognition Conference, FG 2008, ACM International Conference on Image and Video Retrieval (CIVR) 2007 and 2010. He is the general chair of ACM Multimedia 2013, a program chair of ECCV 2016 and was a program chair of ACM Multimedia 2011 and 2007. He has been a visiting professor in Beckman Institute, University of Illinois at Urbana-Champaign and in the Electrical Engineering Department, Darmstadt University of Technology, Germany. He is a co-chair of the IEEE Computer Society Task Force on Human-centered Computing and is an associate editor of IEEE Transactions on Multimedia, Computer Vision and Image Understanding, Machine Vision and Applications, Image and Vision Computing, and of Journal of Multimedia.
