# **GMAR Robotics School 2021**

Draft; do not publish

## **Organization**

Date: tentatively 2021-08-23 - 2021-08-27 (Monday-Friday)

• Location: Villa Blanka; Innsbruck

• Topic: Mobile Manipulation

#### Audience:

- advanced Master and young doctoral students in subject areas related to robotics (engineering, computer science, etc.)
- 15-25? participants, depending on the location
- prerequisite: familiarity with ROS, to be specified; recommend tutorials

## Concept:

- hands-on, making things work on real robots
- technical lectures concentrated near the beginning of the week
- hacking starting day one, growing in importance as the course advances
- hacking in small teams dedicated to specific functionalities
- some application talks towards the end, not relevant to the hacking

### Implementation Goal:

- SLAM, autonomous navigation
- vision-based grasping of (known and/or unknown?) objects from known locations
- placing objects in designated locations
- execution of high-level plans involving the above capabilities

### Robots:

- 1 mobile base + arm platform for each group of 3-4 students
- or, 1 UIBK mobile manipulator (homebrew base with DOBOT M1? Franka Emika Panda)
- or, TUW Honda mobile manipulator

## **Schedule**
