

# Multiple Positions in Robotics/Vision/Learning at U. Innsbruck

The research group in Intelligent and Interactive Systems (IIS), founded in 2010 by Prof. Justus Piater, has multiple openings at the doctoral and post-doctoral levels.

## Our Opportunities

- Positions funded by the EU-FP-ICT “Cognitive Systems, Interaction and Robotics” projects Xperience (<http://www.xperience.org/>) and IntellAct (<http://www.intellact.eu/>)
- Non-permanent university research staff positions with minor teaching requirements

For both types of positions, we seek candidates in the following areas:

- robotic grasping and manipulation using one or two dextrous hands
- computer vision and haptic sensing for robotic grasping and manipulation
- robot learning by demonstration and exploration
- generalization of manipulation skills based on object parts and shapes
- extraction of generic knowledge from sensorimotor experience

Postdoctoral researchers are expected to assume active roles in project leadership and supervision of junior researchers.

Salaries are internationally competitive and commensurate with qualification and experience.

## Your Profile

Applicants for a postdoctoral position should have earned, or be about to earn, a doctoral degree in a relevant area, possess a strong publication record commensurate with experience, and have demonstrated strengths in areas related to the above research topics, such as:

- robotic grasping or manipulation
- force/impedance robot control
- statistical machine learning
- probabilistic modeling and inference
- computer vision

Applicants for a doctoral studentship should have earned, or be about to earn, an M.Sc. degree or equivalent in a relevant area, possess an excellent academic record, and have demonstrated prior achievements in any of the above areas.

All applicants should possess good written and oral communication skills in English, a strong mathematical background, and programming experience in C++ and other languages. Enthusiasm for leading-edge research, a team spirit and independent problem-solving skills are essential.

## The University of Innsbruck, Austria

The history of the University of Innsbruck dates back to 1669. It offers a complete set of academic curricula and currently counts 28000 students. Founded in 2001, the Department of Computer Science is highly active in diverse research domains, and is internationally very well connected.

Innsbruck is home to 35000 students who imprint a distinctive, international student atmosphere upon this beautiful city of 120000. Beautifully located in the Tyrolean Alps, on the Inn river and surrounded by peaks of up to 2718m, Innsbruck offers outstanding opportunities and quality of life all around the year.

## How to Apply

All interested applicants should send a letter of motivation, a curriculum vitae including URLs of theses and dissertations, scanned transcripts and diplomas, and contact information of at least two references as a single PDF file to [Justus.Piater@uibk.ac.at](mailto:Justus.Piater@uibk.ac.at). In addition, post-doctoral applicants should include a list of publications and URLs of 2-3 selected publications.

Applications for non-permanent university research staff positions must be received by February 22, 2012. Otherwise, applications will be considered as they are received, until all positions are filled.
