Working With Us

Ph.D. Student Position in Machine Learning for Robotics at the University of Innsbruck, Austria.

About the Position

The research activity comprises the integration of robotic perception and execution mechanisms for task-oriented object manipulation in everyday environments. The (negotiable) focus is on affordance-driven object part segmentation and reinforcement learning.

The monthly gross salary is based on the FWF salary scale for doctoral candidates (https://www.fwf.ac.at/en/research-funding/personnel-costs). Note that the gross salary per month is paid 14 times per year. Furthermore, the university has numerous attractive offers (https://www.uibk.ac.at/universitaet/zusatzleistungen/).

The earliest possible starting date is November 15, 2023.

Requirements

* M.Sc. degree in computer science or related areas. * Excellent academic record. * Solid background in machine learning and good understanding of robotics, and computer vision mechanisms. * Programming skills in Matlab/Python/C++. * Proficiency in writing and speaking English. * Independent problem-solving skills.
