Safoura Rezapour Lakani

I am a researcher and PhD candidate in Intelligent and Interactive Systems group. I come from Rasht, Iran.

I got my bachelor degree in 2008 in Software Systems engineering from Iran, my bachelor thesis was **Authenticate People with Iris Texture**, here is my poster in INRIA-2012 Summer school in Grenoble, poster

I completed my master degree in Software Systems Engineering in RWTH Aachen in July, 2013. I did my master thesis in attribute-based object recognition and life-long learning on robots. The ICVSS 2013 poster based on object recognition part is poster

I am interested in robotics especially object recognition and learning that can be used in this domain, using scene context in object recognition, natural language processing and also interactive learning.
